Commission:

The clever parent-child tandem coupling for momo tricycles.

- To suit all **Schuchmann tricycles** with free wheeling and / or switchover to free wheeling
- For all 26" – 29" adult's bicycles with and without rear suspension with quick release wheel fixation
- Wheels with full axle or wheel hub gears can be prepared using optionally available adaptors
- The child's seat, luggage carrier and bags can still be fully used on the leading bicycle
- It is possible to attach and remove the tricycle within seconds
- Incl. special axle nuts

Note

Adult bike with rear engine
If the adult bike on which the **follow-me momo.** is to be mounted is equipped with a rear engine, then an adapter other than described above is needed. Please contact us in such case and we will work with you to develop an adapter solution.

If the cable of a rear motor is routed through the axle, compatibility with the **follow-me momo.** is not given.

momo motion. or momo tricycle. with electric drive in combination with the follow-me momo.
Generally we do not recommend to pair a **momo motion.** or **momo tricyle.**, which is equipped with an electric drive, via **follow-me momo.** with an adult bike. This can lead to dangerous situations due to the support that comes from the electric drive.
Please contact us if you still require this combination. We will gladly try to find a solution together with you.
